Amendments to the Specification:

Amend the fourth paragraph on page 4 of the specification (page 4, lines 9-15) to read as follows:

"For further terminology, refer to ATSC Program and System Information Protocol for Terrestrial Broadcast and Cable, (PSIP), A65, Dec. 1997, and Java Security Architecture, Li Gong, October 2, 1998, DRAFT DOCUMENT (Revision 1.0) available at http://java.sun.com/products/jdk/1.2/docs/guide/security/spec/security-spec.doc.html."

Amend the first paragraph on page 29 of the specification (page 29, lines 1-9) to read as follows:

"Regarding the type of applications run on the receiver, the receiver may run applets if it is Internet-capable and can download a pplets applets from the Internet, or have them delivered in the broadcast stream, but the current direction some standard bodies (such as ATSC, DVB) and Sun are going is towards the use of the previously-mentioned Xlet, which is similar to an applet, but is meant for the broadcast/TV domain."
